- ◆ Residential complexes
- ◆ Staircases
- ◆ Glass connecting corridors
- ◆ Entrance areas
- ◆ Hotels, museums, libraries, parking garages
- ◆ Outdoor shop design

Our new AL-WALL PLANT system enables completely new design possibilities by greening the facade. Developed for the unique AL-WALL facade system.

## ATTRACTIVE FACADE DESIGN

With diversely plantable modules you can achieve effective contrasts in the plain glass behind them. Entrance areas, staircases and entire building complexes are given a natural and inviting character. The elements, which can have a maximum width of 2 m, and are either installed at the same height throughout, or placed individually. Depending on the specific project needs, the planter boxes are made by us to fit. Attaching them to the AL-WALL facade system is done minimal time. Retrofitting for existing facades is also possible at any time. The fixing to the glass fittings is vandal-proof.

## THE GREENING

We are happy to assist you with our knowledge of weather and season appropriate planting. By choosing the right irrigation system, even higher planter boxes can be supplied with sufficient moisture. Of course, we will advise your regional gardener. Drainage takes place through small openings at the front edge to avoid waterlogging. So nothing stands in the way of your revitalized facade!
